Attention: **To Whom it may concern**

Reference: **HiTech Stainless Fabrications**

Dear Sir / Madam

BCS has used Hitech as its stainless steel provider for the past 8 years and during this time they have provided a very high standard of both service and quality of work. I have found them always willing to put in the extra effort required when the need arises.

BCS provides baggage handling systems globally and Hitech provide not only our standard stainless steel parts but have also been used for special projects requiring technical consultation to achieve the high standards required by today's Airports. Examples of Hitech's work can be seen at all major airports around Australia in the public areas of check-in and arrivals and in particular the international arrivals carousels at Melbourne and Sydney airport where they provided architecturally designed stainless steel cladding on the feed conveyors to the arrivals carousels.

It is with confidence that I recommend Hitech Stainless Fabrications

Yours faithfully,

A handwritten signature in black ink, appearing to read 'Karl Helle', with a small dot at the end.
